

## FOLACOAT ADVANCE S REPLACES FOLACOAT BASIC 1.35 MM

Dear ladies and gentlemen, dear friends of Folex,

with our Folacoat Basic we have been offering a high-performance and economical coating plate for Packaging Industry for many years. It turned out that demand was met almost exclusively in the thickness of 1.15 mm.

The thickness 1.35 mm of Folacoat Basic instead was not accepted in the Print markets. An efficient production of this coating plate thickness is not possible, due to this development. For this reason, we have now decided to discontinue the production of Folacoat Basic in the 1.35 mm thickness with immediate effect.

We offer you our product [Folacoat Advance S](#) in the thickness 1.35 mm as an efficient and favourable alternative.

Your Folex Team

### ABOUT FOLEX

The Folex group specialises in the finishing and coating of films and specialities and has production companies based in Switzerland (Schwyz) and Germany (Cologne and Erlangen) that offer high-quality products and tailor made services for a wide variety of markets. Today Folex offers solutions for many sectors, from the printing industry or digital and large format printing, the office and home sector, all the way to primary products for the electronics industry.
