

## NEW: FOLEX GO-HA, THE NEW SCRATCH-RESISTANT FILM FOR GLARE-FREE VIEWING

Dear ladies and gentlemen, dear friends of Folex,

for control elements with high-resolution screens, high-gloss or rough surfaces make it difficult to read because they either reflect or scatter. With GO-HA, we are expanding our range of films for input systems with a product you have been waiting for. Our new high-quality, scratch-resistant anti-glare film convinces with an anti-reflective layer on the front and high transparency at the same time. The highly chemical-resistant product can also be printed and processed excellently.

### GO-HA – important product features at a glance:

- Anti-glare surface with high transparency
- Scratch resistance
- Improved UV stability integrated
- Very high chemical resistance
- Perfect printability
- Durable
- Easy to clean

Please send an email to [auftrag@folex.de](mailto:auftrag@folex.de) if you would like samples for your tests. We will be happy to send you A4 samples or a sample package in the format 61cm x 61cm free of charge. You only have to pay for the cost of shipment if the samples are sent internationally.

More information on this product as well as the associated data sheet and product information can be found on our [website](#).

If you have any further questions about GO-HA, please email or call us. We're happy to help.
